

Here are some fun and beginner-friendly project ideas you can try at this stage:

### 1. Personalized Greeting App 🙌

- Create a program that asks for the user's name and favorite color, then prints a personalized greeting like: `"Hello, [Name]! Your favorite color, [Color], is awesome!"`

### 2. Simple Quiz Game 🎮

- Create a multiple-choice quiz with questions about Python, movies, or any fun topic! Display scores at the end and allow the user to play again. 🏆

### 3. Random Joke Generator 🗣️

- Build a program that stores a list of jokes and randomly selects one to display every time the user runs it. Add a fun twist with jokes about Python or programming! 🐍💡
