SDG 13: Climate Action

Project Ideas:

- Climate change data visualization platform
- App for sustainable lifestyle habits
- Real-time climate change monitoring platform
- Green energy consumption tracker
- AI-powered disaster preparedness tool

Guidelines:

- Build platforms that **make climate data easy to read and understand for everyone**.
- Create apps that **encourage eco-friendly habits like recycling, biking, or saving energy**.
- Monitor climate indicators (temperature, storms, rainfall) in **real time**.
- Provide trackers for households and businesses to **measure and reduce energy use**.
- Use AI to **predict disasters early and guide response plans**.

SDG 14: Life Below Water

Project Ideas:

- Marine pollution tracking platform
- Real-time ocean temperature monitoring system
- Platform for sustainable fishing practices
- AI-based marine conservation tool
- Crowdsourced ocean cleanup app

Guidelines:

- Create tools to **track and report marine pollution hotspots**.
- Build systems for **monitoring ocean temperatures and patterns**.
- Provide apps that **teach and promote safe fishing practices**.
- Use AI for **detecting threats to marine life and suggesting interventions**.
- Develop apps that **mobilize volunteers for beach and ocean cleanups**.

SDG 15: Life on Land

Project Ideas:

- Wildlife monitoring app using drones
- AI-powered deforestation detection system
- Sustainable land management platform

- Conservation efforts tracking app
- Forest fire prediction and prevention tool

Guidelines:

- Deploy drones to **monitor and protect endangered species**.
- Use AI to **spot deforestation early through satellite images**.
- Build platforms for **sustainable farming and land use practices**.
- Create apps that **track and showcase ongoing conservation projects**.
- Develop tools for **predicting and preventing wildfires in forests**.

SDG 16: Peace, Justice and Strong Institutions

Project Ideas:

- Legal aid platform for marginalized communities
- Transparency tracking platform for government spending
- Crowdsourced human rights advocacy app
- Online platform for promoting social justice
- AI-driven tool for monitoring peacekeeping efforts

Guidelines:

- Build platforms that **connect vulnerable people with free or affordable legal support**.
- Create transparency apps to **show how public funds are being spent**.
- Develop apps where communities can **report human rights abuses anonymously**.
- Provide online spaces that **educate and advocate for justice and equality**.
- Use AI to **monitor and improve peacekeeping operations worldwide**.

SDG 17: Partnerships to Achieve the Goal

Project Ideas:

- Collaborative platform for global partnerships
- Crowdfunding platform for sustainable development projects
- Data-sharing platform for NGOs
- AI-powered tool for monitoring SDG progress
- Global resource-sharing platform for development projects

Guidelines:

- Build collaborative platforms that **connect NGOs, governments, and businesses to work together**.

- Create crowdfunding platforms that **channel funds into sustainable projects globally**.
- Provide secure data-sharing spaces where **NGOs can collaborate transparently**.
- Use AI to **measure and report progress on SDG targets in real time**.
- Develop platforms for **sharing resources, skills, and technology across borders**.
